ABOUT ME

I’m Peyman Rahimi, an architectural designer with a Master’s degree in Architecture. My work focuses on interior design, custom furniture and cabinetry, and architectural visualization.

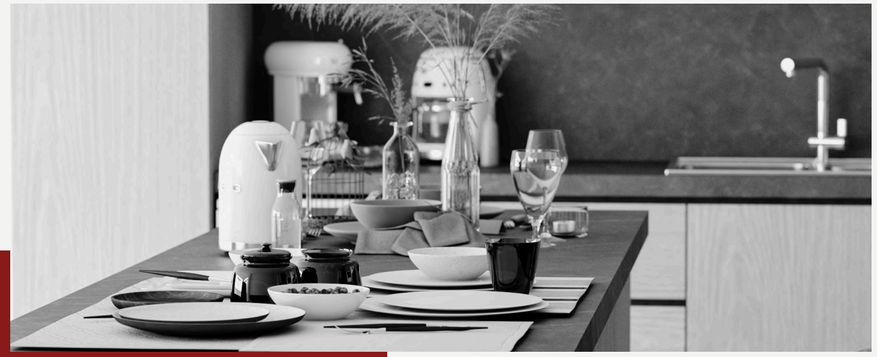

Alongside my design practice, I manage custom projects and coordinate design and site survey teams. This experience has shaped my approach to creating spaces that balance aesthetics, functionality, and practical execution.

SKILLS & SOFTWARE

DESIGN SKILLS

Interior Design & Space Planning
Custom Furniture & Cabinetry Design
3D Modeling & Material Development
Architectural Lighting & Rendering
Cinematic Animation
Design Team & Project Coordination

SOFTWARE

AutoCAD — 2D Drafting & Technical Drawings
Revit — Architectural Modeling & Documentation
3ds Max — 3D Modeling & Scene Development
V-Ray — Materials, Lighting & Photorealistic Rendering
Chaos Vantage — Real-Time Visualization & Animation
Unreal Engine — Real-Time Environments & Cinematic Animation
Photoshop — Image Editing & Render Post-Production
Premiere Pro — Video Editing & Post-Production

SELECTED WORKS

EXECUTIVE OFFICE INTERIOR

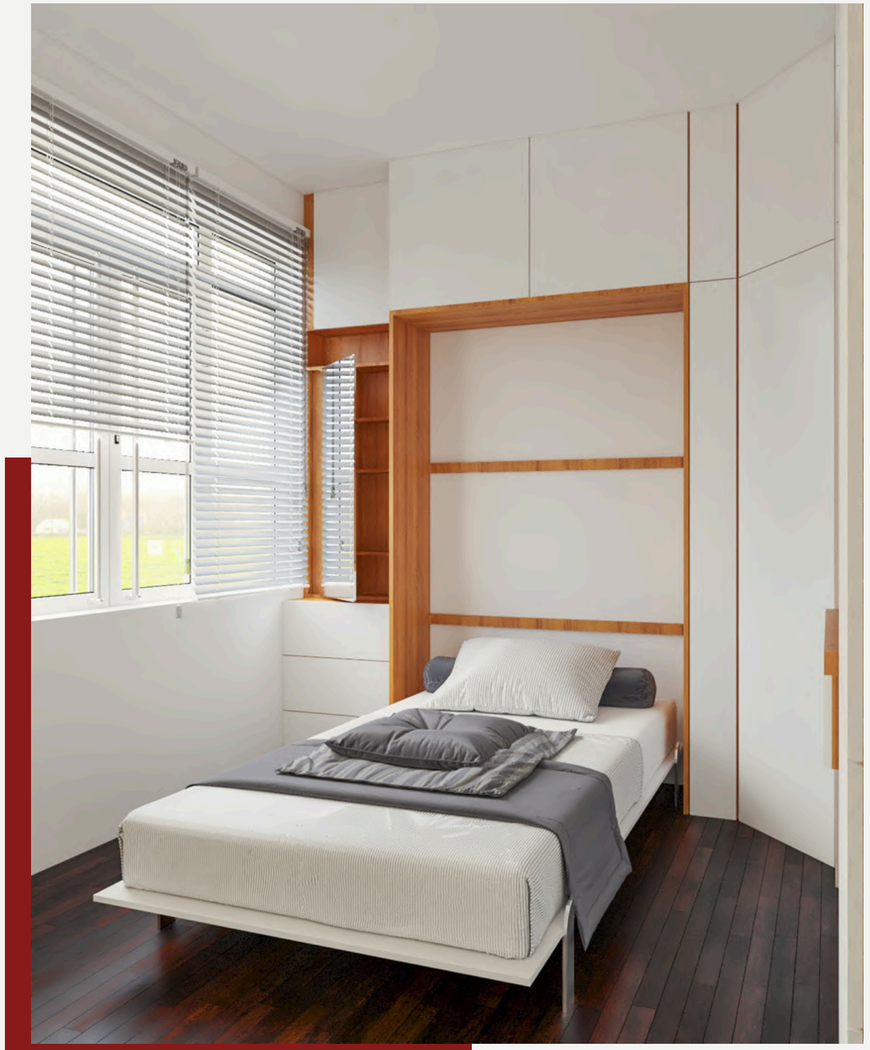

An executive office combining a dedicated workspace with areas for meetings and informal seating. Dark cabinetry, warm wood accents, and upholstered furniture establish a professional yet welcoming atmosphere. Integrated storage, glazed partitions, and layered lighting define the different zones while maintaining visual continuity throughout the space.

MY ROLE: DESIGN, 3D MODELING & RENDERING

YEAR : 2023

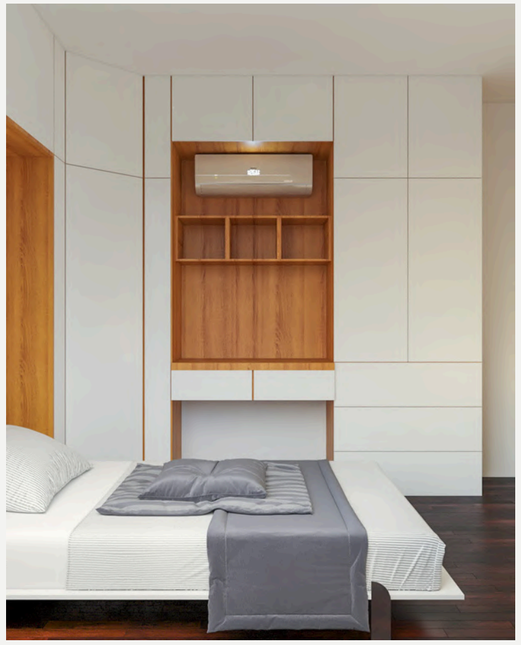

BEDROOM

This bedroom design uses a fold-away bed system to maximize usable floor space and support different activities throughout the day. When closed, the bed integrates seamlessly into the cabinetry, creating room for work, study, or everyday use. Integrated storage and a cohesive material palette keep the space organized while balancing comfort, functionality, and visual simplicity.

MY ROLE: DESIGN, 3D MODELING & RENDERING

YEAR : 2022

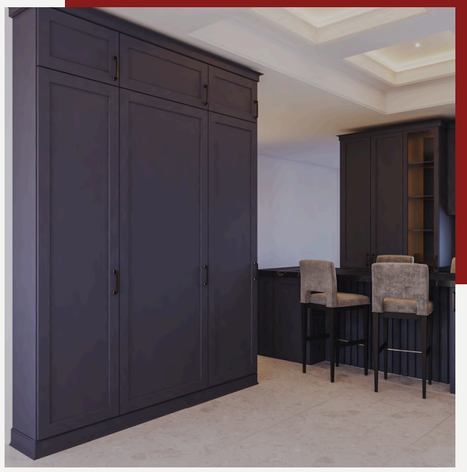

NEOCLASSICAL KITCHEN

This kitchen brings together classical detailing and contemporary functionality. Framed cabinetry, balanced proportions, and subtle decorative elements create a refined, cohesive space. Thoughtful storage and an efficient layout support everyday use, while carefully selected materials and lighting add warmth and emphasize the depth of the design.

MY ROLE: DESIGN, 3D MODELING & RENDERING
YEAR : 2025

MODERN KITCHEN

This modern kitchen pairs clean lines with the warmth and texture of natural wood veneer. The wood grain adds depth and character, while a restrained material palette creates a cohesive atmosphere. Integrated storage and a practical layout keep the space organized, balancing everyday functionality with understated elegance.

MY ROLE: DESIGN, 3D MODELING & RENDERING
YEAR : 2022

ENTRYWAY STORAGE DESIGN

A custom entryway unit combining shoe storage, a full-height mirror, drawers, and an upholstered seat. Clean cabinet fronts and a light material palette create a calm, unified appearance, while illuminated display niches add warmth and depth. The integrated arrangement makes efficient use of the entrance and supports everyday routines.

MY ROLE: DESIGN, 3D MODELING & RENDERING

YEAR : 2023

CUSTOM BUILT-IN WARDROBE

A custom built-in wardrobe combining hanging rails, open shelving, drawers, and pull-out accessories. Warm wood interiors contrast with dark-framed glass doors, while integrated lighting highlights the storage compartments. The internal layout organizes clothing and everyday essentials within a cohesive, functional composition.

MY ROLE: DESIGN, 3D MODELING & RENDERING
YEAR : 2023

CLOSE-UP RENDERS

MATERIALS & DETAILS

A collection of close-up studies exploring fabric textures, surface finishes, and furniture details. Carefully controlled lighting, reflections, and depth of field draw attention to tactile qualities and subtle material contrasts, adding depth and realism to each composition.

MY ROLE: DESIGN, 3D MODELING & RENDERING
YEAR : 2026

RESIDENTIAL FACADE STUDY

DAY & NIGHT VISUALIZATION

A residential facade defined by repeated pitched-roof frames, warm wood tones, and vertical screening. The composition balances solid surfaces and glazing to create depth and a distinctive architectural rhythm. Day and night views explore how natural light and architectural lighting reveal material textures, emphasize the layered geometry, and transform the building's presence within its urban setting.

MY ROLE: SCENE COMPOSITION, SCATTERING, LIGHTING & RENDERING

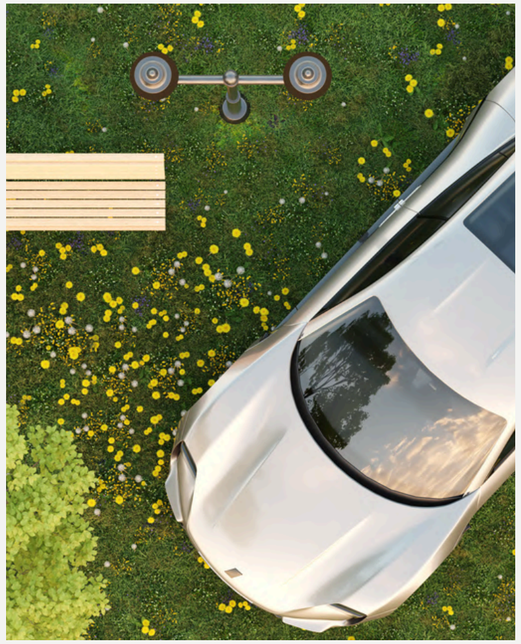

YEAR : 2021

LANDSCAPE DETAIL STUDY

SCATTERING TECHNIQUES

This exterior study explores scattering techniques to distribute grass, flowers, and fallen leaves with natural variation. Differences in scale, rotation, and spacing reduce visible repetition and enrich the ground cover. Sunlight, foliage shadows, and selective depth of field emphasize textures and create depth across the landscape.

MY ROLE: SCENE COMPOSITION, SCATTERING, LIGHTING & RENDERING

YEAR : 2026
